ଏକ କ୍ଷେତ୍ରରେ ଏକ ସଂଗ୍ରହଣ ଏକାକୀ A: Here is the answer var url = ""; var param = {userID: "1"}; \$.get(url, param, function(data) { var results = \$("<div>#user-result</div>").html(data); }); 1. Field of the Invention The present invention relates to a digital broadcast receiver, and more particularly, to a digital broadcast receiver and a method of processing a broadcast signal. 2. Discussion of the Related Art Presently, the technology for processing digital signals is being developed at a vast rate, and, as a larger number of the population uses the Internet, digital electric appliances, computers, and the Internet are being integrated. Therefore, in order to meet with the various requirements of the users, a system that can add video and audio data through a digital bus, etc. in addition to the existing digital broadcast service and transmit the added video and audio data to the digital broadcast receiver is being developed. Moreover, as the technology for processing digital signals is being developed, the usage of portable and mobile electronic appliances, such as a personal digital assistant (PDA), a laptop computer, a portable multimedia player (PMP), etc. is being increased. All the devices can capture images or videos, and save them to the devices or transmit or receive them to or from other devices by using, for example, the internet. Therefore, other methods for saving or transmitting images or videos other than a broadcast program. The number of users of smartphones and tablet PCs, which can connect to the Internet in various locations and are equal to or more powerful than personal computers, is also increasing. Pyrite-carbon interaction: a detailed study by in situ X-ray diffraction and absorption spectroscopy. Using in situ X-ray diffraction, Fourier transform infrared spectroscopy, and electrochemical analysis, we have studied in detail the structural and electrochemical properties of pyrite (FeS₂) before 82157476af
